BYTE PAPER

INTRODUCTION

Birdbyte is like an egg that will grow into an eagle, a goal achieving and a long term project.

We have one goal, and that goal is to make meme tokens hilarious and fun again! It's obvious that, several shitcoins are injected into the cryptocurrency market almost every-day, and painfully majority of them easily die after a couple of weeks or days, why? they have no 'real' use case.

HOW TO ACHIEVE THIS?

To achieve our goal, we want to create and rule a new system for meme coins, a system that publishes awesome multi-player and single player mode mobile games every new quarter of the year, starting Q1 of 2022 (January to March), not to just to publish but partner with major gaming companies to make our token a native currency in their merchandise.

Also, all our games will allow potential, legit and long term **meme coins** to register in our gaming platforms. users can then select which coins they'll want to play to earn or stake. Along with our **NFT non-fungible token protocol**.

WHAT YOU SHOULD KNOW:

Our token is based on the the Binance Smart Chain.

BIRDBYTE Smart Contract is based on the **BEP-20** algorithm, because of its low fuel costs and technology. And our liquidity is held at Pancakeswap, where you can trade our tokens.

BirdByte TOKENOMICS: (15%)

- 5% - Marketing
- 1% - Burn
- 3% - LP
- 6% - Rewards in \$BIB
- TOTAL SUPPLY: 12,000,000
- INITIAL BURN: 30%
- SYMBOL: BIB
- NAME: BIRDBYTE
- NETWORK: SMARTCHAIN
- MAX BUY: 1%
- MAX SELL: 1%

It is normal for people to buy and sell our token at any given time, because as they do so the supply reduces rapidly, thereby; increasing demand to supply ratio and driving the price of \$BIB up.

THE ROADMAP:

Successful launch, Assign Admins and Mods roles, Create Birdbyte social media profiles and the management team. Logo design. Website completion, Contract development, Contract audit, Airdrop distribution, Listings, Marketing campaigns.

Q3: (The arrival)

- Successful launch
- 30% Token burning
